* People reached with WASH services were 110% of target
** People living with HIV on ART reached were 118% of target

UNICEF RESPONSE HIGHLIGHTS & URGENT ACTIONS REQUIRED FOR CHILDREN

5.7 million people across the country have been reached with COVID-19 messages using different communication platforms
137,724 people have been reached with WASH services in 5 provinces of Zimbabwe
267,206 women and children accessing routine essential maternal and child health services across the country

6,755 children have been admitted for SAM treatment in community-based programmes
1,574 children have been provided with community-based mental health and psychosocial support services

70,703 people living with HIV continue to receive treatment services in UNICEF supported facilities

UNICEF is seeking more resources to continue supporting the Government of Zimbabwe in supplying PPE to frontline workers, training of health workers in case management and infection prevention and control. Without adequate funding UNICEF will not be able to continue supporting treatment of acute malnutrition, provision of safe water, education, child protection services, and sustaining people living with HIV to continue on treatment in communities during this pandemic.
